

NOW HIRING FOR A

Data Management and Analytics Summer Intern

This is a ten-week role designed to expose college students to various activities in Data Management and Analytics (DMA). At an apprentice level of proficiency, interns are expected to work closely with and assist experienced staff with proactively delivering value in data analysis, data engineering, data visualization and advanced analytics. The selected intern may help develop new data ingestions, analytical dashboards and may help in finding solutions to issues encountered in DMA technology platforms. Job shadowing various areas of IT is expected to occur for a portion of the internship.

What qualifications are needed?

- Enrolled in a four-year college, with a major in or related to information technology or business with freshman year of college completed.
- Course work or experience related to data, analytics, data sciences, or business.
- Effective verbal and written communication skills.
- Ability to take direction from and work cooperatively with other team members.
- Knowledge and proficient use of SQL programming, Python/ Pyspark, PowerApps (Power BI / Power Automate) is preferred.
- Knowledge of Azure and Databricks is a plus.
- Curiosity and learning agility.
- Ability to think orderly, logically and analytically, and strong problem-solving skills.
- Resourcefulness and creativity in the execution of job tasks.
- Knowledge of the banking industry is a plus.
- Experience with server operating systems is a plus.
