FHLBank
Topeka

NOW HIRING FOR A

# Director of Enterprise Data Management & Analytics

The individual in this role is a demonstrated strategic leader responsible for development, maintenance and execution of the Enterprise Data Management and Analytics Program with focus on governance, architecture, integration, data warehousing, and analytics to enable business-led transformation data strategies to improve and develop new insight capability across all facets of the FHLBank. Key aspect of this role is collaborating with cross-functional business partners, to ensure the fostering of an environment of creativity and innovation while delivering best practice solutions through leveraging experience, thought leadership, and technology to empower a culture that drives strategic objectives through data.

What **qualifications are needed?**

- Bachelor's degree in Computer Science, Data Science, Analytics, Statistics, or related field.
- Senior level of competency with at least 10 years of similar or related professional experience.
- 10 years of progressive information management solutions and end-to-end development life-cycle support and SDLC processes.
- 7 years of experience in statistical analysis, research, and problem-solving role.
- 6 years in a senior leadership role in data management & analytics, overseeing teams, departments, and cross-functional initiatives.
- Highly effective verbal and written communication skills with ability to compose concise, visually appealing presentations and able to interact effectively and influence employees at all levels within the organization.
- Strong track record of attracting, mentoring, and developing talent, fostering a culture of accountability and growth.
- Ability to work collaboratively with leaders and stakeholders across multiple business functions and influence strategy and direction.
- Demonstrated understanding of enterprise data warehouse, big data, BI & analytics, content management and data management.
- Demonstrated experience with developing data strategy, policies, and procedures, as well as successfully executing programs that meet or exceed expectations in a dynamic environment; experience creating tools and capabilities to assist with data discovery & collaboration, ensure data quality, and to load, clean, enrich, manage, and share data and metadata from a variety of sources.
- Deep experience with various business intelligence, data analytics, data governance, and data visualization tools and technologies – AI, SQL, Microsoft Power Platform, Python, R, etc.
- Demonstrated ability to multi-task effectively, responding to changing business priorities and deadlines.
- Strong business understanding and passion for continuous learning.
- Self-starter and intellectual curiosity to seek solutions without direction.
- Attention to detail and ability to consistently meet deadlines.
- Prefer two or more years' experience with Agile development methodologies.
- Must be able to work and travel independently and use general office equipment.
